DETAILED ACTION

1. This action is in response to the application filed 04/16/2001 for serial number 09/807,634.

Election/Restrictions

2. Claims 5-7, 9-15, 18, 21, 22, and 25-35 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention and species, there being no allowable generic or linking claim. Election was made **without** traverse in the papers filed 03/25/2003.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Beschine ('313).

Beschine (Fig. 1) discloses an infinitely variable transmission comprising a rotational input member (M), a rotational output member (R), a pair of variable velocity ratio gear sets (1-1', 3-3', 4-4', 2-2'), a multi-directional coupling (e1,e2,e3,e4), and an actuator associated with the coupling (the electromagnetic control actuates the coupling of e1,e2,e3,e4), and a phase angle variator (L,P, m1,m2), wherein the gear sets have a

constant contact ratio and each variable ratio gear set provides an interval of uniform acceleration an interval of non-uniform acceleration, and the angular period comprises an angular interval of the uniform acceleration common to both of the gear sets.

Allowable Subject Matter

5. Claims 3, 4, 16, 17, 19, 23 and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Birk ('236), Kerr ('091), Sakita ('317) and Sakita ('766) all disclose infinitely variable transmissions with non-circular gear sets.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric M Williams whose telephone number is 703-305-0607. The examiner can normally be reached on Mon. - Fri. from 7:30am - 5:00pm.
